

Midland Highway Spring Hill Upgrade

March 2020

Start of works on the Midland Highway Spring Hill Upgrade

The Midland Highway 10 Year Action Plan sets out the Australian and Tasmanian governments' key priorities for investing \$500 million over 10 years to upgrade the highway and improve road safety and save lives on Tasmania's key north-south freight route.

We will improve road safety by providing a safer road with more overtaking opportunities.

This project will improve the safety of the 3.5 km length of the Midland Highway over Spring Hill, between the recently completed works south of Spring Hill and north of Spring Hill.

Construction will start on in March 2020 and will finish in late 2021, weather permitting.

During construction works will be carried out between the hours of **7 am and 6 pm, Monday to Saturday**.

Traffic changes

Motorists are reminded to slow down and comply with the posted speed limits for all roadwork sites. Speed limits may be reduced when there are changes to the road surface, new or no line marking, changes to safety barriers and fencing, or road workers and equipment on the road or at the side of the road.

The need to reduce the speed may not be obvious, but reduced speed limits are for your safety and the safety of road workers.

You can check for road closures and delays at www.stategrowth.tas.gov.au to get the latest information about possible delays.

Contact

If you have any questions, please contact Andrew Walter Constructions Project Manager Charlie Cunningham on 0458 474 018 or charles.cunningham@awconstructions.com.au.
